

9th Battalion The Royal Queensland Regiment

Plan to Eliminate Competency Deficiencies

The tracking, communication, and achievement of individual training competency shortfalls is a particularly complex issue.

To this end the Commanding Officer has re-tasked the Training Cell at BHQ with the following Mission:

The 9 RQR Training Cell is to identify and eliminate infantry competency shortfalls by designing and executing (or supporting) targeted training additional to the parade card IOT achieve the Battalion Mission.

Their first task is identify. The Cell has designed a spreadsheet that draws directly from PMKeys (as the point of truth). The spreadsheet is user friendly and will reveal to all where our shortfalls lie. This database gives all commanders ready access to this vital information for all of their soldiers. The information will drive our training programs.
